Suregrip Seamless resin anti-slip floor finishes

Suregrip resin floors provide a clean, hard wearing finish to concrete, wood or metal floors.

WHY TO USE ?

- Anti-slip** **Suregrip** floor systems are slip resistant.
- Quick :** **Suregrip** floor systems can be laid in a 30 hour window.
- Seamless :** Provides an even surface suitable for fork lift & hand trolleys
Cracks and joints are eliminated minimising the risk of product contamination.
- Easily cleaned:** Reduces time and cost spent on in-house cleaning. Non porous seamless surface prevents surface contamination and improves the working environment by reducing odours etc.
- Dust free :** Unlike cement based products dust is not created by wear.
- Colour:** Full BS4800 range.
Colour coded systems can be used to comply with safety and statutory requirements.
- Water resistant :** Excellent.. Suitable for use in all wet areas
Resistant to acids and chemical attack unlike cement based products.
- Surface Texture :** Smooth to heavy texture to suit customer requirements

WHERE TO USE ?

- Suregrip F** Use any where a durable hard wearing, slip resistant finish is required
Suitable for use in canteens, kitchens, toilets changing rooms, production areas such as Electronic and Food packing areas. Garages work shops and retail units.
- Suregrip HD** Use where the highest levels of anti-slip are required or where the floor will be subjected to extreme use.
- Suregrip** Is an alternative floor finish for similar cost where sheet vinyl might be considered as suitable.
