

***SUREGRIP Seamless resin floor finishes***

## Features & Benefits

***SUREGRIP*** Seamless resin floors are normally installed to provide a clean hard wearing protective finish to concrete surfaces.

- |                            |   |
|----------------------------|---|
| <b>Seamless</b>            | : Provides even surfaces suitable for fork lift & trolley traffic . No fraying or break down of edges occur allowing hand trolleys to be pushed with minimum effort. Eliminates foreign bodies or dirt from joints, minimising the risk of product contamination. |
| <b>Dust free</b>           | : Unlike cement based products dust is not created by wear.   |
| <b>Easily cleaned</b>      | : Reduces production time and cost spent on in-house cleaning.  |
| <b>Surface Texture</b>     | : Available from smooth to anti-slip to suit customer requirements.   |
| <b>Colour</b>              | : Available in full BS4800 range. Colour coded systems can be used to comply with safety and statutory requirements.  |
| <b>Impact resistant</b>    | : Excellent.  |
| <b>Chemical resistance</b> | : Tolerant to acid and chemical attack unlike cement based products.  |
| <b>Impervious</b>          | : Non porous seamless surface prevents surface contamination and improves the working environment by reducing odours etc.   |
| <b>Anti-static</b>         | : THL anti-static seamless resin floor finishes can be used as part of the measures required under BS5958 to control undesirable static electricity.  |

**Seamless resin screed finishes are recommended in all Pharmaceutical , Electronic and Food processing environments.**
